

Lab 5 – Bootstrap

CS296N, Web Development 2: ASP.NET

Objectives

Get practice:

- Using Bower to add a front-end library to your web project
- Using Bootstrap CSS classes to style your web site

Instructions

- Add Bootstrap 4.0.0 to the Bower package manager
- Style your web pages using the following Bootstrap CSS classes:
 - NavBar
 - Buttons (at least 3)
 - Badges (at least 3)
 - Some other styling of your choice

Submission to Moodle

Beta Version

Upload the following to the Code Review Forum:

1. A zip file containing your Community Info web app's Visual Studio solution folder.
Or, a link to a repository containing your web site solution source code.
2. A code review of your lab partner's work. (You do this after your lab partner submits items 1 and 2 and you review them.)

Production Version

1. Items 1 above but revised as needed.
2. The code review of your work (the one done by your lab partner) with the second column ("Production") completed by you.
