Lab 5 – Bootstrap

CS296N, Web Development 2: ASP.NET

Objectives

Get practice:

- Using Bower to add a front-end library to your web project
- Using Bootstrap CSS classes to style your web site
- Using the Bootstrap grid system to make your web site responsive

Instructions

- Add Bootstrap 4.0.0 to the Bower package manager
- Style your web pages using the following Bootstrap CSS classes:
 - o NavBar
 - o Buttons (at least 3)
 - o Badges (at least 3)
 - O Some other styling of your choice

Submission to Moodle

Beta Version

Upload the following to the Code Review Forum:

- 1. Part 1: A document containing screen-shots of the SportsStore web app from Ch. 8 of the textbook running in your browser. (Please use .docx or .pdf format)
- 2. Part 2: A zip file containing your Community Info web app's Visual Studio solution folder.
 - Or, a link to a repository containing your web site solution source code. You can put the link on the same document with the report on your exercise from part 1.
- 3. A code review of your lab partner's work. (You do this after your lab partner submits items 1 and 2 and you review them.)

Production Version

- 1. Items 1 and 2 above, but revised as needed.
- 2. The code review of your work (the one done by your lab partner) with the second column ("Production") completed by you.
- 3. Optional: A link to your web site running on Azure. (You can put the link on the document containing the screen shots of your exercise from part 1).
